Mr. [redacted] opened the meeting and introduced Terminal Project. The briefing covered the past history of the AFT/CAFT efforts, the present contract award to [redacted] their problems, and the possible slippage of hardware delivery. At this point, several Board Members inquired about on-site and depot spares and training for operators and technicians. Mr. [redacted] elaborated on these aspects and went on to mention the training programs that other Agencies are running for this type of equipment. This concluded the AFT briefing, and Mr. [redacted] asked that he be kept advised of any slippages in the contract.

3. Mr. [] brought up the next item of the meeting, the problems associated with the production of LSI crypto chips. These problems are caused by the

reluctance of industry to set up Top Secret controlled production facilities for the complete crypto chip. The state-of-the-art does not allow the unclassified portion of the chip to be built by industry and then have NSA add the unique variables at their facility. On the other hand, NSA is not capable of producing chips in all technologies that R&D elements might select.

4. A new LASER technique which could solve the above problem is under development by [redacted] Mr. [redacted] proposed that OC establish a study contract with [redacted] at a cost of \$15,000 for evaluating applicability of this technique to crypto chips. He felt this was within the OC charter since it involved the production of crypto key unique to this Agency. A vote was taken, and the Board unanimously recommended this proposal to the D/CO for approval.

5. Since there was no other business, the meeting was adjourned.
